Medical Care Curtain System

2022 COTTAI Curtain System

A SMART SOLUTION FOR MEDICAL CURTAIN SYSTEM

Hospital curtains are a source for spreading bacteria (ex: MRSA, Covid 19), many researches suggest that hospital should implement periodic cleaning to avoid infection.

But due to the curtains always hanged on the ceiling, the job of cleaning become a huge task. It's time wasting and staff of hospital might fall down while cleaning.

Auto lift up/down medical curtain system makes the process of cleaning more easy, fast, and safe.

The fabric can be lowered down by inner motor, which controlled by the remote control or mobile device (works with Apple Homekit, Google Assistant), staff can complete the cleaning mission without trouble.

Medical Modul

Illumination, biorisator... or more!

Illumination can create a well-being environment conducive to the interest of the occupants, reducing depression, and decreasing fatigue. The curtain system can install remote illumination modules to create an indirect lighting, warmer color temperatures lead to the release of melatonin, which is appropriate during bedtime hours.

To improve the effect of disinfection, we also installed a supersonic atomization module. This module can be used with disinfectant liquid (e.g., ZN2+) and activated before or after cleaning, thoroughly killing viruses and bacteria on the surface and in the air.

SPECIFICATIONS

- **ABS Shell** - flame resistance; dust-protected; lightweight
- **Motor** - Provide lifting power
- **Illumination Module**
- **Aluminum Tube For Cord Take-up**
- **Sanitizing Spray Module**
- **Pulley System** - correcting direction of cord
- **RF Wireless Receiver Module**

COTTAI

COTTAI is an outstanding solution by providing non-stop improvements and constant innovations. From the ordinary exports of blind components & accessories to products customized by our own R&D team, our purpose is to provide better and more suitable curtain blind components for you.

We are very focused on solving the problems encountered by users. If customers are expecting to develop unique parts that are not available in the market, our professional R&D team will brainstorm with you to design high-quality, ideal and unique products together!

COTTAI is not just a supplier of curtain parts. We grow from the regular production and sales to offering the development service. Business model extends from the traditional one to the digital platform management.

COTTAI also committed to Corporate Social Responsibility, such as distributing daily necessities to rural areas, or donating medical masks to the epidemic area. We consider the needs of people, and listen attentively to narrow the gap between people.
